M. Legault,
You are really in a hurry to conclude the negotiations? Then give mandates to your representatives at the sectoral tables. For the past 18 months, all we’ve been getting are negative responses to our priority demands and that, Sir, is unacceptable!

Is the educational success of Quebec Inuit and Cree youth important to you? What have you been doing to attract and retain staff? What are you offering to make the working conditions of our members competitive?

The working conditions need to be improved, and it mainly comes down, among other things but mainly, to an improvement in their regional disparities benefits, especially for Inuit and Cree.

Our teaching and support staff from the Cree and Kativik school boards deserve better!
